► CLINICAL EXPERIENCE

- For the last fifteen years, I have been working as a consultant in general obstetrics and gynaecology and gynaecology oncology at King Abdullah University Hospital, Jordan. I am particularly responsible for provision of care for patients with gynaecological

cancers at our institution, which involves performing complex surgical operations for all types of gynaecological cancers, and all other aspects of patient's care including the administration of chemotherapy.

- I have a wide-range clinical experience in obstetrics and gynaecology. I have RCOG level 2 accreditation in laparoscopic surgery, BSCCP/RCOG accreditation in Colposcopy and I am competent in performing outpatient hysteroscopy. In obstetrics, I am competent in performing all types of operative delivery and antenatal decision-making. I have experience in ultrasound diagnosis of both gynaecological and obstetrical problems.
- During my stay in UK, I had specialist training in gynaecological oncology at Cambridge Cancer Centre and Ipswich cancer centre, during which time I gained experience in different modalities of diagnosis and management of patients with gynaecological malignancy. I have assisted in and undertaken most surgical operations including surgery for advanced ovarian cancer, radical hysterectomy and surgery for vulval cancer. I have become familiar with various adjuvant therapeutic modalities including chemotherapy and radiotherapy.
