WORK EXPERINCE

Internship

A 12 months internship divided into multiple rotations covering all major specialties.

Residency

A 5 years integrated academic program with surgical training at King Abdullah University hospital (KAUH) which is a tertiary hospital covering the whole north of Jordan with a population of around 2 million. Also, the program is supervised by Jordan University of Science and Technology (JUST) granting the graduate with a Higher Degree in Medicine. During the program I was exposed to a wide range of specialties gaining surgical knowledge and skills. As I became a last year resident I was able to perform most of the common general surgical procedures (Laparoscopic and open) independently with minimal or no direct supervision. also, I was involved in teaching and supervising my junior colleagues. Moreover, as KAUH is the primary teaching hospital for JUST medical students I was involved in the teaching process of medical students including teaching rounds and morning reports.

Al-Safa Specialty Hospital

I worked for around six months in the hospital having my own practice and clinic as a General surgery specialist.

Teaching Assistant/JUST

I was involved in teaching both 4th and 6th year medical students during their surgical rotations this includes teaching rounds, morning reports, seminars and lectures. Also, I was involved in teaching residents and interns.

Plastic Surgery Fellow/ KAUH

I was a full time fellow at the plastic surgery service at KAUH. This includes covering clinics and emergency plastic cases under supervision. Also, in theatre, I performed minor plastic procedures under supervision and assisted in major plastic and reconstructive procedures.

International Clinical Fellow in Plastic Surgery/Sheffield Teaching Hospital NHS Trust

I was a full-time clinical fellow at STH NHS trust in the Plastic surgery department for almost 3 years, I had been on the Registrar Rota shortly after my start. I had good exposure and involvement in various aspect of Plastic surgery including both emergency and elective procedures. I had rotated through all the teams on the department including elective/trauma hand surgery, skin cancer surgery, breast reconstruction, sarcoma surgery, paediatric plastic surgery and burns.

Senior Clinical Fellow in Plastic Surgery/ North Bristol NHS Trust

I am having further experience and exposure to various areas of plastic surgery during my stay at Bristol especially with Microsurgical reconstruction of both breast and lower limb giving that Bristol is a known Centre both nationally and internationally at its excellence in Microsurgical reconstruction. Additionally, I gained more confidence in covering Clinics (Both trauma and elective) and Theatre list (Trauma/elective, GA/LA) independently.
